

## INTRODUCTION

We would like to welcome you to our fourteenth on property ram sale.

- Inspection:** Rams can be inspected on sale day from 10.00am.
- Sale:** 1.30 pm.
- Delivery:** On completion of sale.  
Rams may stay until transport is arranged-please notify selling Agents after the sale on Buyer's instruction slip. In the event of any stock remaining for late delivery, all care and no responsibility is taken by vendor.
- Selling Agents:** Elders – Gundagai/Tumut  
Landmark - Wagga Wagga
- Rebate:** 2% to outside Agents following introduction prior to sale.
- Health:** OJD Vaccinated.  
Accredited Brucellosis Free – Y.303.  
Footrot free.  
Drenched with Zolvix 08/09/2017  
Vaccinated with-Glanvac 6in1 & B12 22/08/2017  
Backlined with Zapp 22/08/2017

**Groups of rams will be sold under a 2 & 3 hammer system.**

- Luncheon:** BBQ lunch and refreshments provided before the sale.  
Drinks after.

The Vendors accept no responsibility for the accuracy nor the responsibility of the information supplied in this catalogue.

Entry into property is taken at your own risk.

*Thankyou Andrew, Donna, Joe, James, Luke, Sally & Zac*

# ASBVS and Indexes explained

## What are ASBVs?

ASBVs (and Indexes) are the units of measurement LAMBPLAN, MERINOSELECT and KIDPLAN use to analyse animals. **Australian Sheep Breeding Values** are an estimate of an animal's true breeding value based on pedigree and performance recorded information. They are essentially a projection of how that animal's progeny will perform for a range of traits.

## ASBV types

- *Birth Weight (BW)*  
ASBV is based on measured birth weight of lambs adjusted for age of dam. Where birth weights are not available it is estimated as a correlated trait from weight measurements taken as the lamb matures. The lower the ASBV the lighter is the estimated progeny birth weight potential.
- *Weight (WWT) (PWWT)*  
ASBVs describe the animals' genetic merit for growth rate. A positive ASBV means the animal is genetically faster growing. Weight ASBVs are available for weaning (100 days), post-weaning (200 days), and yearling, hogget and adult ages.
- *Fat Depth (PFAT)*  
ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal.
- *Eye Muscle Depth (PEMD)*  
ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.
- *Carcass + -* Selecting animals involves balancing several key traits. To make selection easier traits can be combined into a selection index.

## Ultrasonic Rib Eye Muscle Scanning In Live Sheep

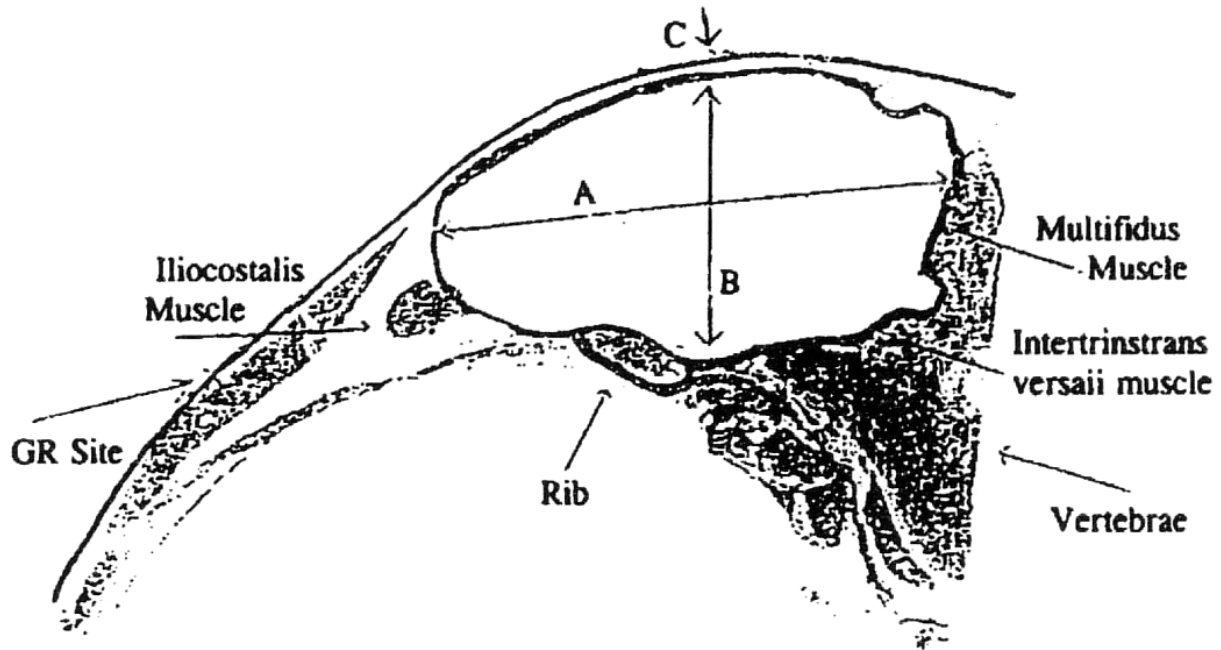

Fig 1 - Exposed 12th rib on the carcass cut through the last thoracic and first lumbar vertebrae

### MEAT INDEX

The meat index formula is based on the eye muscle width (A), eye muscle depth (B) and fat (C) measurements. A higher weighting is given to eye muscle width (A) because it is more heritable while eye muscle depth (B) is influenced by environmental factors. Fat (C) is penalised slightly. The resulting number is then adjusted for the age of the sheep to get an index.

### NOTE:

- Current Live Weight = C/LW
- Eye Muscle Area (EMA) is calculated using the eye muscle width and eye muscle depth measurements.

## LOOK NO FURTHER THAN VALLEY VISTA

IF you are looking for Poll Dorset rams which will produce lambs for the domestic and export markets then you should look no further than the Valley Vista stud. The Valley Vista Poll Dorset stud was founded in 1976 and moved from its original home at Burrumbuttock, New South Wales, to Coolac, NSW in 1990. The stud was expanded in 1991 when Valley Vista stud principals Andrew and Donna Scott purchased the entire Meadow Creek stud from the late Ernie Britt. There was further expansion for the stud in November 2006 when the Scotts purchased 550 ewes and stud sires from the Gererdan stud, which at the time was among the top studs in Australia. In 2008 Joe, James and Luke Scott founded the Valley Vista Park stud with the purchase of 18 stud ewes at the Kismet dispersal sale. The Scotts have continued to add to their genetic base over the years with purchases of genetics from the Armdale, Armdale Park, Tattykeel, Hillden, Kurralea and Graythorn studs. Combined the studs have built the numbers up to approximately 1000 stud ewes. This provides good numbers to select from, allowing the stud to cull heavily.

When selecting rams for their stud's breeding program the Scott's have placed emphasis on traits such as ease of lambing and high growth rates. They also place emphasis on producing a well-muscled and structurally correct sheep. One of the main selection criteria's is selecting for high growth rate. All lambs are weighed at weaning and then two more times at thirty day intervals. These weights are converted to grams/day. Lower than 300 to 350 grams/day are culled. The lambs doing better than 300 to 350 grams/day (depending on the season) are retained in the stud. The stud also scans all rams, using Stockscan, for muscle area and individual data on each animal. This information is sent to SIL (a New Zealand based recording outfit) along with the weight information. This data is processed and comes back with a ranking for ram and ewe lambs. A ranking is also received on the stud ewes which enables for a culling of any ewes that are not producing quality lambs. The stud has now entered the SIL information into Lambplan. There is up-to-date Lambplan figures available. Both studs produce stud and flock rams that will produce quick maturing, well muscled lambs for the domestic market as well as lambs that will go on to the export market. Many of the Scotts clients are benefitting from the great prices received at market with the Merino Ewe x Dorset Ram enterprise, through being able to sell suckers straight off mum

The Scotts started showing at major shows in 2000 and in that year exhibited the reserve champion ewe at the NSW Cowra Dorset Fair. The stud has had continuing success over the years in the show ring, consistently bringing home blue ribbons as well as the much sort after broad ribbons. 2017 has been no different. The Canberra Royal Show turned into a clean sweep for the stud winning Champion Ram and Ewe, Reserve Champion Ram and Ewe. Also won broad ribbons for Supreme Short Wool Ewe and Supreme Group of the show. Sydney Royal saw the stud winning Reserve Champion Ewe. At the recent ASWS in Bendigo the stud continued the run winning Reserve Champion Ram, Mixed Pair and Group of 1 Ram 2 Ewes.

Proving the stud is consistently breeding rams that are early maturing well-muscled and structurally correct. It will be a busy time for the Valley Vista Stud. Andrew is in his last term as President of the Australian Poll Dorset Association.

## SIRE SUMMARY 2017

VV38-09 - He has proven himself as one of the best rams bred at Valley Vista.  
Consistently breeding length and style. Very successful show career  
with 7 thirds in 2010.  
Sired by Arm465/07.

VV61-12 'ABLETT' Sired by Arm465/07. 1st Shorn Ram Gundagai 2013.

HUNTINGDON 33-09 'Wombat' bought in from New Zealand to add great carcass and muscling

VV110-13 - Sired by VV115/10. Grandson of Tattykeel Topgun.  
Great Bone and Topline.

VV206-13 Sired by Wombat.  
Heavy Muscled Ram with a great Carcass, very similar to his sire Wombat

VV43-13 Sired by Ger101/01.  
Very correct and safe ram with a powerful pedigree.

VV422-13 'PRIDDIS' Sired by VV25/11.  
Continues on from a great family line, Brilliant structure  
Reserve Senior Champion Ram at Bendigo ASBA.

VV43-14 Sired by VV38-09  
Long powerful ram retained for his length and depth of hindquarter

VV713-13 Sired by VV126/11  
Very Muscular Ram with great structure.

VV138-14 (Fyfe) - Another Son of the great VV38-09  
Watch out for this rams sons over the next few years  
Supreme Poll Dorset Ram at Bendigo 2015

Kurralea521-14 - Purchased to add some outside blood  
Big, Correct and Stylish Sire

Tattykeel 90-14 - Purchased to follow our Tattykeel Bloodline Family  
Was an outstanding ram lamb weighing 85kg at 5 months old  
Champion Ram Lamb Australisian 2014

**Ewe 160-16**  
Supreme Short Wool Ewe at Canberra  
Reserve Champion Ewe at Sydney  
Champion Mixed Pair Bendigo

**Ram 69 -16**  
Reserve Champion Ram at Bendigo  
Retained in Stud - Semen available

# HOW TO FIND VALLEY VISTA

Take the Coolac/Cootamundra turn off from the new Hume Freeway,  
And turn left at the Coolac Pub and  
Valley Vista is about 200m on the left.

---

## Sheep Data Management

Working towards a more productive, efficient and profitable sheep industry

- Sheep Genetics service provision
- Data management for stud flocks
  - Commercial data management
  - Software help and support

***If you want to improve something...  
You need to start measuring it!***

**Elise Bowen**

Ph: 0428 420 981

"Valley Vista"  
Hume Highway  
COOLAC  
NSW 2727

## SCOTT'S SCANNING

Ultrasonic pregnancy scanning allows you to -

- Identify singles, twins and drys.
- Ageing – split early and lates, making management easier.
- Increase twin survival rates
- Manage twin bearing ewes so they will be re-joined in good body condition.
- Objectively select the twins as your replacement stock.
- Sell dry sheep early and free up more feed.
- Reduces ewe deaths from Pregnancy Toxaemia

Andrew Scott - 0419 208 272 Joe Scott - 0429 220 492

# TUBELINE WRAPPER

NEW COST EFFECTIVE WAY OF WRAPPING SILAGE

WRAPPING SQUARE BALES UP TO 3X3 BY 5X6 AND ROUND  
BALES UP TO 5FT6

- . 40% cheaper than individually wrapped bales.
  - . Less plastic used.
- . Easier to feed out than individually wrapped bales.
- . Will store the silage effectively for at least 2 years.
  - . Can wrap up to 80 bales of silage per hour.
- . Bales can still be transported with plastic still left on.
  - . Far more cost effective.

After 8 years of going to New Zealand I have noticed the change in trend from individually wrapped bales to tubeline wrapping.
