

INTRODUCTION

We would like to welcome you to our on-property ram sale.

- Inspection:** Rams can be inspected on sale day from 10.00am.
- Sale:** 1.30 pm.
- Delivery:** On completion of sale.
Rams may stay until transport is arranged-please notify selling agents after the sale on Buyer's instruction slip. In the event of any stock remaining for late delivery, all care and no responsibility is taken by vendor.
- Selling Agents:** Elders – Gundagai/Tumut
Landmark - Wagga Wagga
- Rebate:** 2% to outside Agents following introduction prior to sale.
- Health:** OJD Vaccinated.
Accredited Brucellosis Free – Y.303.
Footrot free.
Drenched with Zolvix 4/09/2018
Vaccinated with-Glanvac 6in1 & B12 4/09/2018

Groups of rams will be sold under a 2 & 3 hammer system.

- Luncheon:** BBQ lunch and refreshments provided before the sale.
Drinks after.

The Vendors accept no responsibility for the accuracy nor the responsibility of the information supplied in this catalogue.

Entry into property is taken at your own risk.

ASBVS and Indexes explained

What are ASBVs?

ASBVs (and Indexes) are the units of measurement LAMBPLAN, MERINOSELECT and KIDPLAN use to analyse animals. **Australian Sheep Breeding Values** are an estimate of an animal's true breeding value based on pedigree and performance recorded information. They are essentially a projection of how that animal's progeny will perform for a range of traits.

ASBV types

- *Birth Weight (BW)*
ASBV is based on measured birth weight of lambs adjusted for age of dam. Where birth weights are not available it is estimated as a correlated trait from weight measurements taken as the lamb matures. The lower the ASBV the lighter is the estimated progeny birth weight potential.
- *Weight (WWT) (PWWT)*
ASBVs describe the animals' genetic merit for growth rate. A positive ASBV means the animal is genetically faster growing. Weight ASBVs are available for weaning (100 days), post-weaning (200 days), and yearling, hogget and adult ages.
- *Fat Depth (PFAT)*
ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal.
- *Eye Muscle Depth (PEMD)*
ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.
- *Carcass + -* Selecting animals involves balancing several key traits. To make selection easier traits can be combined into a selection index.

Ultrasonic Rib Eye Muscle Scanning In Live Sheep

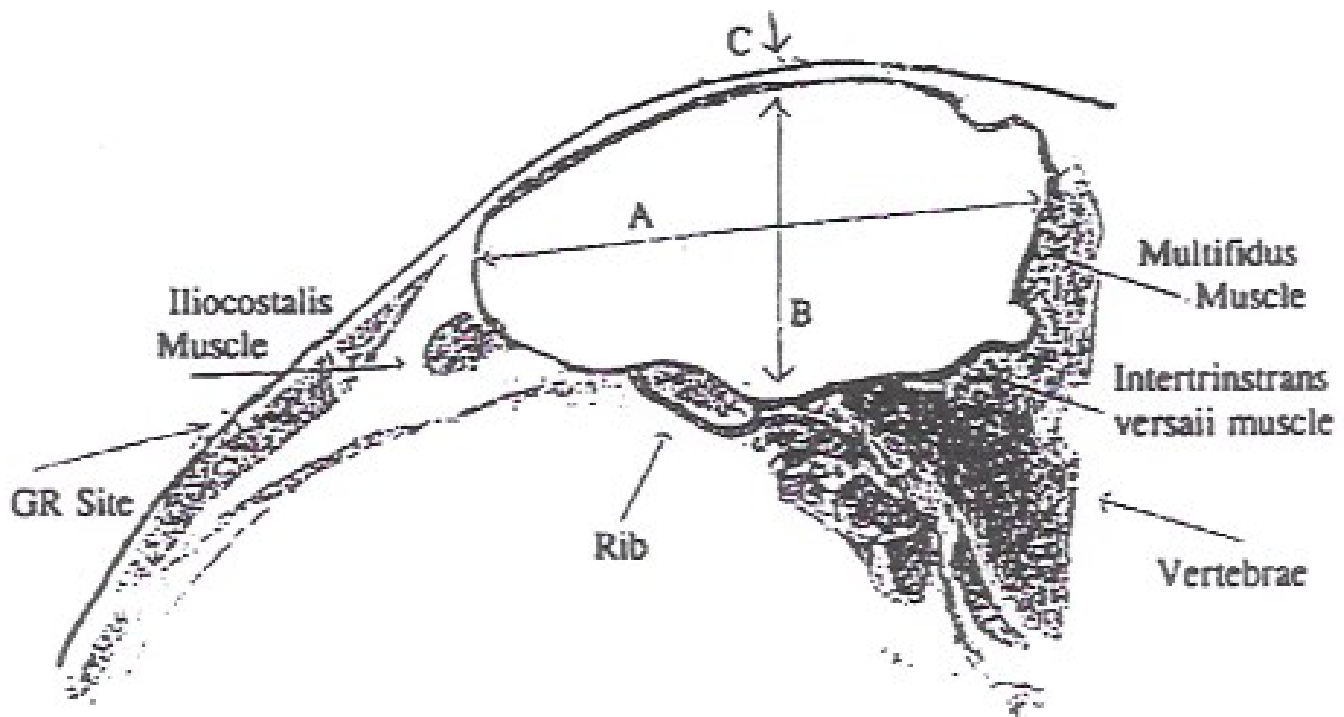

Fig 1 - Exposed 12th rib on the carcass cut through the last thoracic and first lumbar vertebrae

MEAT INDEX

The meat index formula is based on the eye muscle width (A), eye muscle depth (B) and fat (C) measurements. A higher weighting is given to eye muscle width (A) because it is more heritable while eye muscle depth (B) is influenced by environmental factors. Fat (C) is penalised slightly. The resulting number is then adjusted for the age of the sheep to get an index.

NOTE:

- Current Live Weight = C/LW
- Eye Muscle Area (EMA) is calculated using the eye muscle width and eye muscle depth measurements.

LOOK NO FURTHER THAN VALLEY VISTA

IF you are looking for Poll Dorset rams which will produce lambs for the domestic and export markets then you should look no further than the Valley Vista stud. The Valley Vista Poll Dorset stud was founded in 1976 and moved from its original home at Burrumbuttock, New South Wales, to Coolac, NSW in 1990. The stud was expanded in 1991 when Valley Vista stud principals Andrew and Donna Scott purchased the entire Meadow Creek stud from the late Ernie Britt. There was further expansion for the stud in November 2006 when the Scotts purchased 550 ewes and stud sires from the Gererdan stud, which at the time was among the top studs in Australia. In 2008 Joe, James and Luke Scott founded the Valley Vista Park stud with the purchase of 18 stud ewes at the Kismet dispersal sale. The Scotts have continued to add to their genetic base over the years with purchases of genetics from the Armdale, Armdale Park, Tattykeel, Hildlen, Kurralea and Graythorn studs. Combined the studs have built the numbers up to approximately 1000 stud ewes. This provides good numbers to select from, allowing the stud to cull heavily.

When selecting rams for their stud's breeding program the Scott's have placed emphasis on traits such as ease of lambing and high growth rates. They also place emphasis on producing a well-muscled and structurally correct sheep. One of the main selection criteria's is selecting for high growth rate. All lambs are weighed at weaning and then twice more at thirty day intervals. These weights are converted to grams/day. Lower than 300 to 350 grams/day are culled. The lambs doing better than 300 to 350 grams/day (depending on the season) are retained in the stud. The stud also scans all rams, using Stockscan, for muscle area and individual data on each animal. This information is sent to SIL (a New Zealand based recording outfit) along with the weight information. This data is processed and comes back with a ranking for ram and ewe lambs. A ranking is also received on the stud ewes which enables for a culling of any ewes that are not producing quality lambs. The stud has now entered the SIL information into Lambplan, and combined with further data recorded on farm has produced up-to-date Lambplan figures. Both studs produce stud and flock rams that produce quick maturing, well-muscled lambs for the domestic market as well as lambs that will go on to the export market. Many of the Scott's clients are benefitting from the great prices received at market with those using Poll Dorset rams over Merino, first-cross or composite ewes being able to sell suckers straight off mum for more than 700c/kg.

The Scotts started showing at major shows in 2000 and in that year exhibited the reserve champion ewe at the NSW Cowra Dorset Fair. The stud has had continuing success over the years in the show ring, consistently bringing home blue ribbons as well as the much sort after broad ribbons. 2018 has been no different. After winning champion ram at the NSW Dorset Championships in Cowra, the same Valley Vista ram, 58/17, went onto to be supreme Poll Dorset at the Australian Sheep and Wool Show in Bendigo. Valley Vista has just returned home from the Australasian Dorset Championships winning Champion Ram Lamb for the second year running, proving the stud is consistently breeding rams that are early maturing, well-muscled and structurally correct.

SIRE SUMMARY 2018

VV61-12 'ABLETT' Sired by Arm465/07. 1st Shorn Ram Gundagai 2013.

VV110-13 - Sired by VV115/10. Grandson of Tattykeel Topgun. Great Bone and Top line.

VV206-13 - Sired by Wombat. Heavy Muscled Ram with a great Carcass, very similar to his sire Wombat

VV43-13 - Sired by Ger101/01. Very correct and safe ram with a powerful pedigree.

VV422-13 'PRIDDIS' - Sired by VV25/11. Continues on from a great family line, Brilliant structure. Reserve Senior Champion Ram at Bendigo ASBA.

VV713-13 - Sired by VV126/11. Very Muscular Ram with great structure.

VV138-14 (Fyfe) - Another Son of the great VV38-09. Producing a very exceptional line of progeny. Supreme Poll Dorset Ram at Bendigo 2015

Kurralea521-14 - Purchased to add some outside blood. Big, Correct and Stylish Sire

Tattykeel 90-14 - Purchased to follow our Tattykeel Bloodline Family. Was an outstanding ram lamb weighing 85kg at 5 months old. Champion Ram Lamb Australisian 2014.

Kurralea 211-98 – Used in AI program. Is most used Sire in Poll Dorset History.

Kurralea 241-14 (Syd) – Used in AI program. Young Sire with great length and smooth shoulders.

Hildden 145-10 – Used In AI program. We bought him in 2011 and decided to use again. Has crossed very well with our ewes.

Kurralea 809-04 (Phoenix) – Used in AI program. Was heavily used at Valley Vista in the past.

VV493-12 (Dewy) – Used in AI program. Son of Hildden 145-10. Muscle packed Sire with strong bones and structure.

Ulandi Park 178-12 - Used in AI program. Complete outside blood used for outcross genetics.

VVP22-15 ET – Sired by VV38-09. Embryo Transfer Son out of a leading dam. Tremendous length with great structure. Was used over our ewe lambs in the Spring program.

VV66/18 - Champion Ram Lamb
Australasian Dorset Championships - Bendigo

VV58/17 & VV29/17
Mixed Pair Cowra Dorset Championships and ASWS Bendigo

TUBELINE WRAPPER

Looking for a cost effective way of wrapping silage?

- 40% cheaper than individually wrapped bales
- Easier to feed out and less plastic used
- Stores silage effectively for at least two years
- Wraps up to 80 bales of silage an hour
- Bales can still be transported with plastic on
