## What are ASBVs?

Australian Sheep Breeding Values (ASBVs) are the units of measurement Sheep Genetics platform LambPlan use to predict genetic performance of sheep. ASBVs are an estimate of an animal's true breeding value based on pedigree, performance recorded information and genomics. They are a projection of how that animal's progeny will perform for a range of traits. Indexes combine important production traits into one number and are a useful way to rank animals quickly and easily.

## ASBV types

**Birth Weight (BW):** ASBV is based on measured birth weight of lambs adjusted for age of dam. Where birth weights are not available it is estimated as a correlated trait from weight measurements taken as the lamb matures. The lower the ASBV the lighter is the estimated progeny birth weight potential.

**Weight (WWT) (PWWT):** ASBVs describe the animals' genetic merit for growth rate. A positive ASBV means the animal is genetically faster growing. Weight ASBVs are available for weaning (100 days), post-weaning (200 days), and yearling, hogget and adult ages.

**Fat Depth (PFAT):** ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal.

**Eye Muscle Depth (PEMD):** ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.

**TCP Index:** The TCP index has been created to assist producers to achieve both gains in their major production traits, such as post-weaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling).

## How to find Valley Vista

Take the Coolac/Cootamundra turn off from the new Hume Freeway, turn left at the Coolac Pub and Valley Vista is about 200m on the left

## Ewe Family Breeding Lines

**Valley Vista ewe family breeding lines are indicated by their swing-tag colour. Sires are written above the ewe ID number on swing tags, and are also listed in the catalogue.**

**Red** This is Valley Vista's Tattykeel based family, consisting of high quality sires purchased over the years including TAT90-14, TAT222-04, TAT400-17 and most recently the \$32,000 purchase TAT274-20. This line includes retained sire VV210106 (see sire listing).

**Green** Green is Valley Vista's oldest family line, based around the Armdale and Armdale Park bloodlines. Currently the most prominent sires in this family are VV138-14 (Fyfe) and VV38-09. This is our most dominant female breeding line, producing ewes that's progeny are standouts each year.

**Purple** This is our New Zealand connected family, consisting of NZ sire purchased Huntington 33-03 (Wombat) and sons we've retained of his.

**White** White indicates the Valley Vista Park prefix, which contains a mixture of bloodlines; you can refer to their sire numbers on top of the dam ID swing tag for their connections. Lots of outcross genetics in this line.

**Yellow** This line has been bred with a focus on Lambplan ASBVs. Sires include Derrynock 33-18, Ivadene 31-22, and Hillcroft Farms

**Orange** Orange are our H190110 and SW170250 sons, including 2022 Champion of Champion VV210155 and his progeny.

## Joining Sires

**All joined sale ewes were pregnancy scanned on 28/12/2025, to lamb early April 2026. Ewes have been running with rams up until date of sale. Ewes will be scanned again the day prior to the sale and any updated information provided on the supplementary sheet.**

**VVP240093:** This ram could be the best data and phenotype in one package we have bred so far at Valley Vista. Sold in our October 2025 sale for \$5000 to stud duties, we retained semen and used him on select ewes in our November AI program.

**VV210006:** A Tattykeel 400-17 son that had a very successful show career and has backed it up by producing some great sons. A real industry leading sire that was a standout at weaning and continued through to be one of our carcassed and correct rams at Valley Vista. Will be used heavily over the years.

**Tattykeel 170400:** Purchased to continue our Tattykeel family. Was an outstanding ram lamb weighing 85kg at 5 months old. Champion Ram Lamb Australasian Dorset Championships 2014.

**Ivadene 220031:** Purchased last year for his outstanding data combined with phenotype. Top 1% for TCP and carcass. His lambs are impressing us.

## Sire Summary 2026

**VV140138 'FYFE':** Another Son of the great VV38-09. Producing a very exceptional line of progeny. Supreme Poll Dorset Ram at AS&WS 2015.

**VV190493:** By SW250-27, this is another low-birth weight sire. He's a clean pointed ram that has also bred exceptionally well in his first season at Valley Vista.

**VV210006:** A Tattykeel 400-17 son that had a very successful show career and has backed it up by producing some great sons. A real industry leading sire that was a standout at weaning and continued through to be one of our carcassed and correct rams at Valley Vista. Will be used heavily over the years.

**VV210155:** The most successful ram on the show floor bred at Valley Vista to date. Nationally Champion of Champions Poll Dorset Ram of 2022, having won a swag of accolades. Will play a big role in the future of Valley Vista. A sire full of length, muscle and bone, his sons are very very impressive, do not miss out.

**VV220411:** A son of the widely used Hillcroft Farms 130156 crossed with stud favourite Fyfe. Used for linkage and for his IMF in the 20%.

**VVP220064:** Another by Hillcroft Farms 130156, this sire is in the top 1% for post weaning eye muscle depth and carcass muscle depth. Also in the top 20% for lambing ease.

**VV240106:** One of the top ram lambs produced in 2024, this sire stood second to his show mate VV240155 at NSW Dorset Championships and Australian Sheep & Wool Show. Used in the Bowen Park Trial in 2025.

**VV240155:** A son of our champion VV210155, this ram lamb won at the NSW Dorset Championships and Australian Sheep & Wool Show, and was placed second at the Australasian Dorset Championships. Used extensively after breeding so well as a ram lamb.

**Tattykeel 170400:** Purchased to continue our Tattykeel family. Was an outstanding ram lamb weighing 85kg at 5 months old. Champion Ram Lamb Australasian Dorset Championships 2014.

**Derrynock 180033:** Purchased for \$19,000 for his high indexing LambPlan data and impressive growth PEMD, and overall index.

**Ivadene 220031:** Purchased last year for his outstanding data combined with phenotype. Top 1% for TCP and carcass. His lambs are impressing us.

## Sheep Data Management

Working towards a more productive, efficient and profitable sheep industry

**Sheep Genetics service provision • Data management for stud flocks**

**Commercial data management • Software help and support**

***If you want to improve something... You need to start measuring it!***

# S R S

SCOTTS RAM SHEARING

Based out of Gundagai NSW, Scotts Ram Shearing is willing to travel to provide you with a modern and efficient way of shearing. Give us a call or find us on Facebook or Instagram to sort out all your Ram shearing needs today.

## GET IN CONTACT

Give Luke a call on **0402 744 255**, find us on Facebook or Instagram to discuss your location, number of rams and when you would like to shear. We do our best to accommodate your needs.

01

## SET UP

No shearing shed is required, but power to run the trailer is essential. The trailer is 2.2m wide and 3m tall, fitting through most gates and can be set up by hooking onto any race or yard set up that is available.

02

## SHEAR RAMS

No sedation is required as the Peakhill ShearEzy machine handles large sheep with ease, resulting in less stress for the sheep, in particular reducing damage to the scrotum to ensure sperm quality stays high. Scotts Ram Shearing is perfect for Stud sheep, with us taking extra care on presentation.

03

## JOB DONE

Rams can be let straight back into the paddock once shorn, job done.
