simon@coolacvet.com.au

On the 10th of September 2021 we inspected the Valley Vista ram group. The goal of this is to provide a pre-sale fertility assessment of individual rams, so that their clients can be confident that rams purchased should be fertile, functional and ready to work. To our knowledge the protocol undertaken is leading the sheep seedstock industry in doing more rigorous fertility assessments as a baseline for all rams pre-sale.

Each ram is examined for several fertility traits, which have all been recorded with the rams individual ID and are available to buyers if needed. These traits include scrotal circumference, testicle tone and palpation of structures associated with the testicle, penis examination (which in general has not been practiced by industry to date), teeth assessment including jaw alignment, and leg and feet assessments.

Fertility assessment is a single point in time activity. The vendor has done everything possible to provide rams that are ready to work. However, we strongly advise that once the ram is home and settled, it is wise to check them before their first joining, and EVERY year 6-8 weeks pre-joining. A lot of work is expected of rams, and their functionality is paramount to your flock's fertility. They are a high value animal, but only if they are in working order. Please don't let them get over-fat, aim to keep them in body condition score 3, look after their feet, practice good biosecurity, be aware of Brucellosis risks, and have an accredited veterinarian assess their reproductive potential each year, so that EFFECTIVE rams are being put to work.

Please feel free to call with any questions or if further information is required.

Regards, Tom Graham

Look no further than Valley Vista

If you are looking for Poll Dorset rams which will produce lambs for the domestic and export markets then you should look no further than the Valley Vista stud. The Valley Vista Poll Dorset stud was founded in 1976 and moved from its original home at Burrumbuttock, New South Wales, to Coolac, NSW in 1990. The stud was expanded in 1991 when Valley Vista stud principals Andrew and Donna Scott purchased the entire Meadow Creek stud from the late Ernie Britt. There was further expansion for the stud in November 2006 when the Scotts purchased 550 ewes and stud sires from the Gererdan stud, which at the time was among the top studs in Australia. In 2008 Joe, James and Luke Scott founded the Valley Vista Park stud with the purchase of 18 stud ewes at the Kismet dispersal sale. The Scotts have continued to add to their genetic base over the years with purchases of genetics from the Armdale, Armdale Park, Tattykeel, Hillden, Kurralea and Graythorn studs. Combined the studs have built the numbers up to approximately 1000 stud ewes. This provides good numbers to select from, allowing the stud to cull heavily.

When selecting rams for their stud's breeding program the Scott's have placed emphasis on traits such as ease of lambing and high growth rates. They also place emphasis on producing a well-muscled and structurally correct sheep. One of the main selection criteria is selecting for high growth rate. All lambs are weighed at weaning and then twice more at thirty day intervals. These weights are converted to grams/day. Lower than 300 to 350 grams/day are culled. The lambs doing better than 300 to 350 grams/day (depending on the season) are retained in the stud. The stud also scans all rams, using Stockscan, for muscle area and individual data on each animal. Scans are also combined with further data recorded on-farm to produce up-to-date Lambplan figures.

Both studs produce stud and flock rams that produce quick maturing, well-muscled lambs for the domestic market as well as lambs that will go on to the export market. Many of the Scott's clients are benefitting from the great prices received at market with those using Poll Dorset rams over Merino, first-cross or composite ewes being able to sell suckers straight off mum for more than 900c/kg.

Sire Summary 2021

VV138-14 'FYFE': Another Son of the great VV38-09. Producing a very exceptional line of progeny. Supreme Poll Dorset Ram at AS&WS 2015.

Tattykeel 90-14: Purchased to continue our Tattykeel family. Was an outstanding ram lamb weighing 85kg at 5 months old. Champion Ram Lamb Australasian Dorset Championships 2014.

Springwaters 250-17 (Taz): Has been a very impressive Sire producing a stylish, fast maturing very sound line of offspring.

Tattykeel 400-17 (Martin): 1st June Drop Ram Australasian Dorset Championships. His line of sons in the sale will catch your eye and will suit both First-Cross and Merino operations.

VV58-17 (Mitchell): Champion Ram NSW Dorset Championships and Champion Ram Australian Sheep and Wool Show. A T90/14 son. A very impressive young sire that over the years we hope will breed a sought after line of sons for our clients.

Derrynock 33-18: Purchased for \$19,000 for his high indexing LambPlan data and impressive growth PEMD, and overall index.

Springwaters 22-18 (Guinness): Used as an AI sire, a ram with a powerful carcass, with the structure to get him around the paddock.

VV493-18: One of Andrew's favourites bred at Valley Vista, very impressive structure and balance, with topline and clean points that the Poll Dorset industry is after.

VV64-18: Reserve junior champion at the Melbourne Royal as a lamb, which proves his early maturity and growth at a young age was impressive. A big, long ram.

VV101-19: Sold in last year's sale to the Johnstons as a stud sire, used here at Valley Vista lightly as a lamb.

ASBVS and Indexes explained

What are ASBVs?

ASBVs are the units of measurement LAMBPLAN use to analyse animals. Australian Sheep Breeding Values are an estimate of an animal's true breeding value based on pedigree and performance recorded information. They are essentially a projection of how that animal's progeny will perform for a range of traits. Indexes combine important production traits into one number and are a useful way to rank animals quickly and easily.

ASBV types

Birth Weight (BW)

ASBV is based on measured birth weight of lambs adjusted for age of dam. Where birth weights are not available it is estimated as a correlated trait from weight measurements taken as the lamb matures. The lower the ASBV the lighter is the estimated progeny birth weight potential.

Weight (WWT) (PWWT)

ASBVs describe the animals' genetic merit for growth rate. A positive ASBV means the animal is genetically faster growing. Weight ASBVs are available for weaning (100 days), post-weaning (200 days), and yearling, hogget and adult ages.

Fat Depth (PFAT)

ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal.

Eye Muscle Depth (PEMD)

ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.

TCP Index

The TCP index has been created to assist producers to achieve both gains in their major production traits, such as post-weaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling).

Joe Scott 0429220492 | facebook.com/valleyvistapd

Valley Vista Charolais

Ultrasonic Rib Eye Muscle Scanning In Live Sheep

Fig 1 - Exposed 12th rib on the carcass cut through the last thoracic

Meat Index

The meat index formula is based on the eye muscle width (A), eye muscle depth (B) and fat (C) measurements. A higher weighting is given to eye muscle width (A) because it is more heritable while eye muscle depth (B) is influenced by environmental factors. Fat (C) is penalised slightly. The resulting number is then adjusted for the age of the sheep to get an index.

NOTE:

- Current Live Weight = C/LW
- Eye Muscle Area (EMA) is calculated using the eye muscle width and eye muscle depth measurements.

Sheep Data Management

Working towards a more productive, efficient and profitable sheep industry

Sheep Genetics service provision • Data management for stud flocks

Commercial data management • Software help and support

If you want to improve something... You need to start measuring it!

SCOTTS RAM SHEARING

Efficient, modern shearing.

NO SEDATIVE

No sedation is required as the machine handles the animal. Sheep can walk straight back into the paddock. A more cost effective solution for farmers.

SPACE

The trailer is 2.2m wide and 3m tall, fitting through most gates and can be set up by hooking onto any race that is available.

EFFICIENT

No shearing shed required. No stress for the sheep in shearing shed, no stress for the farmer.

SAFE

The ShearEzy machine handles large sheep with ease, resulting in less stress for the sheep, shearer and farmer.

PRESENTATION

Scotts Ram Shearing Trailer is perfect for Stud sheep, taking extra care on presentation.

BIG OR SMALL JOBS

10 rams to 200 rams, there is no job too big or small for the trailer.

TUBELINE WRAPPER

Looking for a cost effective way of wrapping silage?

- 40% cheaper than individually wrapped bales
- Easier to feed out and less plastic used
- Stores silage effectively for at least two years
- Wraps up to 80 bales of silage an hour
- Bales can still be transported with plastic on

S0720

Part A To be completed by the owner or person who is responsible for the husbandry of the sheep or lambs.

Owner of sheep or lambs **AB & DL SCOTT** (FULL TRADING NAME)
 Property/place where the journey commenced **VALLEY VISTA COOLAC** (ROAD ADDRESS) **2727** (STATE)

Property Identification Code (PIC) of this property **NG292042**
 This MUST be the PIC of the property that the stock is being moved from

Description of sheep or lambs

Number	Year born (DROPP)	Description (BREED, SEX & TYPE E.G. CROSS-BRED, WETHER, LAMB)	Month of shearing	PIC or Brand on Ear Tags (IF DIFFERENT TO PIC SHOWN ABOVE)	Earmarks (IF PRESENT OR REQUIRED)
150	2020	Pguldorset Rams			00 00 00 00
150	Total				

A. Have PICs on all of the NLLS tags only on sheep in this consignment been listed in the Description table above (other than the PIC printed on this NVD)? - Yes OR

B. Have all sheep in this consignment been tagged with an NLLS tag with the PIC printed on this NVD or the associated WA brand as listed in the description table above - Yes AND/OR

Number of electronic NLLS devices in this consignment _____
 Hours off feed and water before transporting _____

Consigned to _____ (NAME OF PERSON OR BUSINESS)

Destination (if different) of sheep or lambs _____ (TOWN/SUBURB) _____ (STATE)

Destination PIC (REQ: WA & TAS) _____ (LOCATION ADDRESS)

Details of other statutory documents relating to this movement e.g. health statement _____ NUMBER _____ OFFICE OF ISSUE _____ EXPIRY DATE _____ /20

1 Have these sheep or lambs been raised consistent with the rules of an independently audited QA program on the property the PIC of which is shown above?
 Yes No If Yes, give details: _____ NAME OF PROGRAM _____ ACCREDITATION OR LICENSE NO. _____

2 Have all the sheep or lambs in this consignment been treated with a Scabby Mouth Vaccination either at marking or at least 14 days prior to their presentation for sale?
 Yes No If No, how long ago were the sheep or lambs obtained or purchased? (If purchased at different times, tick the box corresponding to the time of the most recent purchase.)
 A. Less than 2 months B. 2-6 months C. 6-12 months D. more than 12 months

3 Were all of these sheep or lambs bred by the owner or vendor?
 Yes No If No, how long ago were the sheep or lambs obtained or purchased? (If purchased at different times, tick the box corresponding to the time of the most recent purchase.)
 A. Less than 2 months B. 2-6 months C. 6-12 months D. more than 12 months

4 Are any of the sheep or lambs in this consignment still within a Withholding Period (WHP) or Export Slaughter Interval (ESI) as set by APVMA or SAFE MEAT, following treatment with any veterinary drug or chemical?
 Yes No If Yes, give details: (Record additional details in question 7)
 CHEMICAL PRODUCT _____ DATE APPLIED _____ /20 _____ DATE FIRST FED/GRAZED _____ /20 _____ DATE FEEDING/GRAZING CEASED _____

5 In the past 60 days, have any of the sheep or lambs in this consignment consumed any material that was still within a withholding period when harvested, collected or first grazed?
 Yes No If Yes, give details:
 CHEMICAL PRODUCT _____ DATE APPLIED _____ /20 _____ GRAZING WHP _____ DATE FEEDING/GRAZING CEASED _____

6 Have the sheep or lambs in this consignment ever in their lives been fed feed containing animal fats? (See Explanatory Notes)
 Yes No

7 Please include any additional information below eg: vaccination programs, animal health certification, additional declarations, etc.

Declaration

I **DONNA SCOTT** FULL NAME
VALLEY VISTA COOLAC 2727 FULL ADDRESS
 _____ ADDRESS CONT.

declare that, I am the owner or the person responsible for the husbandry of the sheep or lambs and that all the information in part A of this document is true and correct.
 I also declare that I have read and understood all the questions that I have answered, that I have read and understood the explanatory notes, and that, while under my control, the sheep or lambs were not fed restricted animal material (including meat and bone meal) in breach of State or Territory legislation.

Signature* **Donna Scott** Date* **01/10/2021**
 *Only the person whose name appears above may sign this declaration, or make amendments which must be initialled.
 Tel no. **09 453234** Fax no. **09 453234**
 Email. **valleyvista@valleyvista.com.au**

Part B To be completed by the person in charge of the sheep or lambs while they are being moved.
 Completion of this part is optional in SA and VIC.

Movement commenced: _____ /20 _____ (am/pm)
 Vehicle registration number(s): _____

I _____ FULL NAME
 am the person in charge of the sheep or lambs during the movement and declare all the information in Part B is true and correct.
 Signature _____ Date _____ /20 _____ Tel no. _____
 *When more than one truck is carrying the sheep or lambs, other vehicle registration numbers are to be recorded.

- 8 DELIVERY**
Arrange transport of livestock at your expense.

SCOTT'S SCANNING

PREGNANCY SCANNING OF SHEEP

ULTRASONIC SCANNING ALLOWS YOU TO

- Identify singles, twins & dries
- Manage mob by ageing lambs to split early and lates
- Increase twin survival
- Manage twin bearing ewes to rejoin in good condition
- Select twins as replacement stock
- Sell dry sheep early and free up feed
- Reduce deaths from Pregnancy Toxemia
